NON-DEFAULT PIPELINE ARGUMENTS

```
python run_pipelineV2.py --loop 1 11 --col is_minority --samp 500 --dir
results
```

- `--loop`: A set of random number generator seeds for reproducibility; here, $[1, 11)$

- `--col is_minority`: The name of the "stressor" column in the data set

- `--samp 500`: The sample size of the minority class (should be $< 2/3$rds of the total number available; the CTN-0094 Database has 1074 minority participants)

- `--dir`: The path to an empty directory to save the results; here, `"results/"`
